

■ NEW

The leading French professional mixer specialists have launched a unique **COMBINED VEGETABLE SLICER / FOOD PROCESSOR**.

A NEW **DYNAMIC®** WAY TO PREPARE FOOD !

DYNAMIC®, THE FRENCH COMPANY KNOWN FOR ITS EXPERTISE IN DYNAMIC FOOD PREPARATION, IS LAUNCHING A UNIQUE COMBINED VEGETABLE SLICER / FOOD PROCESSOR. DURING THE HOST MILAN SHOW IN ITALY (18 TO 22 OCTOBER). IT PROMISES TO BE A REAL ALTERNATIVE TO TRADITIONAL EQUIPMENT ALREADY ON THE MARKET.

■ FRENCH DESIGN AND PRODUCTION

It took 4 years for the French SME with two production sites based in Mortagne sur Sèvre (85) and in Vence (06), to bring this new combined vegetable cutter to the kitchen counter.

Its unique shape and design, including a soft and round-shaped orange base, provides the perfect aesthetic for professional kitchens, making it ideal for food preparation in an open kitchen. Time and care were taken to design the ergonomic features, carefully observing user habits, and the device's versatility meets market expectations. Details and features, some of which are patented, guarantee safe and hygienic use to the operator.

Made in France, the device allows you to cut fruit and vegetables in numerous styles with a large choice of stainless steel discs. As a cutter it cuts, grinds, blends, kneads in the blink of an eye thanks to different "ready to go" configurations.

MOTOR MADE IN FRANCE

DYNAMIC is the only French SME producing its own motors in its industry. They have received worldwide culinary recognition with nearly 80% business in the export market!

■ A UNIQUE AND PATENTED DEVICE

All of the elements making up the new COMBINED DYNAMIC VEGETABLE SLICER / FOOD PROCESSOR can be assembled and disassembled by hand. The clever and patented disassembly system allows operators to return elements that have been in contact with food to the dish washer within a few seconds.

The carrying handle that is integrated into the base of the device, makes carrying and cleaning effortless. As a Vegetable Cutter **the ergonomic, stainless-steel push handle** makes the device easy to use by both right and left handed people. When used as a Cutter, the **quick attachment system** makes setting up the bowl and the lid instantaneous and intuitive. The control panel is set up according to kitchen requirements and provides different speeds making it suitable for all recipes.

■ A FOCUS ON DURABLE DEVELOPMENT

80% of the COMBINED DYNAMIC VEGETABLE SLICER / FOOD PROCESSOR is constructed from two entirely recyclable materials, stainless steel and aluminium. DYNAMIC has minimised the amount of plastic in this device. And the remaining plastic is BPA free!

Additionally, the company has always made sure that their products are repairable. Just as with the rest of the product range, the Combined Vegetable Cutter/Slicer is easily repaired, disassembled and reassembled. DYNAMIC also guarantees that its spare parts are immediately available.

Finally, as with the whole DYNAMIC range, the Combined Vegetable Cutter/Slicer comes under the end-of-life WEEE (Waste Electrical and Electronic equipment) conforming to the provisions of Directive 2012/19/CE dated 4 July 2012.

AN ECO-RESPONSIBLE DEVICE

- ✓ MAXIMUM PROPORTION OF STAINLESS STEEL COMPONENTS.
- ✓ FULLY STAINLESS STEEL DISCS FOR THE VEGETABLE CUTTER AND A STAINLESS STEEL TANK FOR THE SLICER.
- ✓ THE DEVICE CAN BE REPAIRED.
- ✓ VERY LITTLE PLASTIC (BPA FREE).
- ✓ RECOVERY AND TREATMENT ACCORDING TO THE WEEE DIRECTIVE.
